Abstracts

GPFs are used for controlling the emission levels of particulate matter number of direct fuel injected gasoline cars. They are fitted with the exhaust system of the vehicle. The filter's substrate wall traps and collects the particulate matter from the engine exhaust gases before releasing, reducing the particulate emission levels.

SCOPE OF THE REPORT:

This report focuses on the Gasoline Particulate Filter for Passenger Cars in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
