### SCOPE OF THE REPORT:

This report focuses on the Glass Beads in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the past several years, the glass beads industry enjoyed a fast development due to many road construction projects. With the development, the global total capacity of glass beads is about 1.65 million MT and the actual output is about 1.27 million MT. The demand of road reflective materials occupied the largest share of glass beads market. These roads need maintenance annually, so the demand is rather stable. And with building new roads, the demand will increase stably.

International giants like 3M and Potters can provide high end products used in aerospace industry and automotive industry. USA is a major supplier and a major consumption market of glass beads. But with the development of Chinese glass beads industry, the USA glass beads industry was impacted.

In China, Hebei was the major production base of low-refractive glass beads in the last few years. But due to the strict environmental policies and high energy cost, manufacturers were moved to northeast China, where the price of gas is low.

The high-refractive glass beads manufacturers are located in east China and south

China, and they generally have high technology and high profitability. But these manufacturers can just have low production due to the limited market demand. In the next years, Chinese glass beads industry will get larger development. There will be more manufacturers producing high-end glass beads products and the price will also be lower.

The worldwide market for Glass Beads is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
