### SCOPE OF THE REPORT:

This report focuses on the Glass Lined Reactor in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the Glass Lined Reactor industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in China and Europe. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost has competitive disadvantage, as the Chinese Glass Lined Reactor production technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase.

China's Glass Lined Reactor industry has developed into a national industry with certain research and production capacity, industry product mix has gradually improved, currently China has become international Glass Lined Reactor large production country, but the production technology is relatively laggard, it can only produce some low-end product, although the new production lines is increasing, the high-end product is still relying on import.

Currently the global top three external sale manufacturers are: Pfaudler, Zibo Taiji Glass Lined Equipment and De Dietrich Process Systems, their production market share is over 55%, although a batch of new projects are put into production in recent years, in short future, the competition pattern will not change.

The worldwide market for Glass Lined Reactor is expected to grow at a CAGR of roughly 5.3% over the next five years, will reach 650 million US\$ in 2023, from 470 million US\$ in 2017, according to a new GIR (Global Info Research) study.
