Abstracts

Grinding media is used to finely grind material to a size which allows recovery of the desired contained material. It comes in different forms such as grinding balls, grinding cylpebs, rods or even beads.

SCOPE OF THE REPORT:

This report focuses on the Grinding Media in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The technical barriers of grinding media are relatively not high, resulting in numerous manufacturing enterprises. In the market, there are some relatively large enterprises, such as Moly-Cop, Magotteaux, AIA Engineering, ME Elecmetal, Gerdau, Donhad, Scaw, EVRAZ NTMK, Litzkuhn-Niederwippe, FengXing, Shandong Huamin. The price of China products is relatively low due to low-end product. China is the largest producer, accounting for more than 50% of total production in terms of volume in 2015.

Grinding media have a wide range of application in the industries of cement, metallurgy, thermal power, chemical engineering, ceramic & coating, papermaking, magnetic materials, etc. especially in power plant and metallurgy industry, the consumption of the two industries occupied about 70% share of total amount. The demand for grinding media is expected to continue increasing during the remaining years of the forecast period of 2017-2022. Grinding media industry will usher in a stable growth space.

In the past few years, the price of grinding media has decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of grinding media.

As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. During this time, there are some new capacities under construction in grinding media industry. With the capacity released in the future, the competition in grinding media industry will become more intense.

The worldwide market for Grinding Media is expected to grow at a CAGR of roughly 0.7% over the next five years, will reach 1120 million US\$ in 2023, from 1080 million US\$ in 2017, according to a new GIR (Global Info Research) study.
