Abstracts

A Helium Leak Sensor or Helium Leak detector is used to locate and measure the size of leaks into or out of a system or containing device. The tracer gas, helium, is introduced to a test part that is connected to the leak detector. The helium leaking through the test part enters through the system and this partial pressure is measured and the results are displayed on a meter.

SCOPE OF THE REPORT:

This report focuses on the Helium Leak Sensor in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the coming years there is an increasing demand for Helium Leak Sensor in the regions of United States and Europe that is expected to drive the market for more advanced Helium Leak Sensor. Growth in government budgets in the principal countries, increasing of Electronics fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on Automotive, Power Industry, retrofitting and renovation of old technology, increasing adoption of Helium Leak Sensor will drive growth in United States and Europe markets.

The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on

to customers, their results of operations and financial condition would suffer.

The worldwide market for Helium Leak Sensor is expected to grow at a CAGR of roughly 2.2% over the next five years, will reach 160 million US\$ in 2023, from 140 million US\$ in 2017, according to a new GIR (Global Info Research) study.
