## Abstracts

High Heat Melamine Foam is a foam-like material consisting of a formaldehyde-melamine-sodium bisulfite copolymer, widely used in industrial, construction, transportation, aerospace etc.

### SCOPE OF THE REPORT:

This report focuses on the High Heat Melamine Foam in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Regionally, China is the biggest Consumption area of High Heat Melamine Foam in the world and china is the most potential market with the fastest growing rate of 18.22%. From the view of application market, 56.03% is the most active and potential field because of the widely use of transportation. Although there is big difference between big companies such as BASF with new companies, especially in the price of products, customers still willing to pay more money to achieve products or service with higher quality. Therefore, it will become harder and harder for a new company which doesn't have its own core technology and R&D team to survive in this Technology-intensive battle.

As a new kind of polymeric foam materials, the Consumption process will become mature gradually with more and more companies enter this field. As two key parameters, density and Temperature range play vital role in the quality system of High Heat Melamine Foam. Cause formaldehyde will do harm to the environment, it is urgent to develop one kind of alternative raw materials.

For price trend analysis, a key variable in the performance of High Heat Melamine Foam producers is raw material urea and formaldehyde, specifically the speed at which

any increase can be passed through to customers.

For next few years, the global High Heat Melamine Foam revenue would keep increasing with annual growth rate with 9.31%. Global Consumption capacity High Heat Melamine Foam will still grow. With the development of technology, the price of High Heat Melamine Foam will keep declining, and the profit margin will decline too.

...

The worldwide market for High Heat Melamine Foam is expected to grow at a CAGR of roughly 8.3% over the next five years, will reach 21 million US\$ in 2023, from 13 million US\$ in 2017, according to a new GIR (Global Info Research) study.
