## **Abstracts**

High intensity separators are used for cleaning of material from impurities as well as for concentration and accumulation processes for minerals. They are best used to separate fine particles which have poor magnetic properties. The utilization of extremely powerful permanentmagnetic material guarantees superior separation results.

### **SCOPE OF THE REPORT:**

This report focuses on the High Intensity Magnetic Separator in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

First, for industry structure analysis, the High Intensity Magnetic Separator industry is relatively unconcentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top 3 players are Mineral Technologies, SLon Magnetic Separator Ltd and Metso, which accounts for 13.6% revenue of the global market.

Second, the sales of High Intensity Magnetic Separator increased from 4145 Units in 2013 to 5297 Units in 2017 with an average growth rate of more than 6.32%.

Third, Europe occupied 21.24% of the consumption volume market in 2017. It is followed by North America which have around 16.84% of the global total industry. Geographically, Asia-Pacific was the largest consumption market, which took about 32.36% of the global consumption volume in 2017.

Fourth, for price trend analysis, a key variable in the performance of High Intensity Magnetic Separator producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global High Intensity Magnetic Separator revenue would keep increasing with CAGR of 4.44%. We tend to believe that this industry still has a bright future, considering the current demand of High Intensity Magnetic Separator.

The worldwide market for High Intensity Magnetic Separator is expected to grow at a CAGR of roughly 4.5% over the next five years, will reach 280 million US\$ in 2023, from 210 million US\$ in 2017, according to a new GIR (Global Info Research) study.
