Abstracts

Dry-mix mortars have become a kind of common mortar in developed countries. In the construction industry, building additives added is essential. However, in developing countries, about 80% of dry-mix mortars are used in the building sector not modified. In many regions, construction experts have only just started to appreciate the benefits of polymer-modified dry-mix mortars. In China, the hydrophobizing agents are added in dry-mix mortars just in recent years.

Hydrophobizing agent (for dry mix mortar market) market survey is mainly focus on China region. In this report, we mainly statistics four types of products namely hydrophobic polymers, silicone based product, fatty acid type product and metallic stearates. At the same, only solid powder products are included in this survey for only solid powder hydrophobizing agents can be used for dry-mix mortars. And China dry-mix mortars market survey mainly focus on China too.

In this report, all of the data are from the Chinese companies (Included multinational corporations' China base). And all of the companies are major manufacturers.

SCOPE OF THE REPORT:

This report focuses on the Hydrophobizing Agents for Dry-mix Mortars in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

China hydrophobizing agents industry has great potential. Firstly, there are seldom big companies in China, almost no listed companies. China hydrophobizing agents industry

is relatively fragmented. Many Chinese companies can only produce one or two kinds of hydrophobizing agents.

China enterprises have no raw materials advantage compared with Wacker. Wacker (Nanjing Base, Zhangjiagang Base) can use its own raw materials. WACKER is the world's most important organic silicon and emulsion manufacturer. Currently, in China hydrophobizing agents industry, China's local enterprises have not formed a complete industrial chain. Besides, compared with Wacker, Chinese enterprises downstream customers is not stable. In addition, WACKER has obvious technological advantage.

The worldwide market for Hydrophobizing Agents for Dry-mix Mortars is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
