Hydroxypropyl Methacrylate (HPMA), a colorless transparent liquid, is a kind of special methacrylate monomer, which is mainly used in coatings, reactive resins and adhesives.

SCOPE OF THE REPORT:

This report focuses on the Hydroxypropyl Methacrylate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Hydroxypropyl methacrylate mainly application in coating, reactive resin, adhesives, etc. Wide range of downstream applications, the demand increases year by year over the world.

Hydroxypropyl methacrylate product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a more market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials.

The presence of competition problems, but the global recovery trend is clear, investors are still optimistic about this area; there will still be some new investment to enter the field in the future.

Along with the development of Chinese domestic Industrial Naphthalene, Chinese domestic hydroxypropyl methacrylate has been very mature and advanced, and the performance distance has been shortening compared with the imported hydroxypropyl methacrylate.

Although sales of hydroxypropyl methacrylate brought a lot of opportunities, the study

group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the hydroxypropyl methacrylate field.

The worldwide market for Hydroxypropyl Methacrylate is expected to grow at a CAGR of roughly -0.8% over the next five years, will reach 190 million US\$ in 2023, from 200 million US\$ in 2017, according to a new GIR (Global Info Research) study.
