Abstracts

Ice hockey is a contact team sport played on ice, usually in a rink, in which two teams of skaters use their sticks to shoot a vulcanized rubber puck into their opponent's net to score points. Ice hockey skates are skates for the ice hockey.

SCOPE OF THE REPORT:

This report focuses on the Ice Hockey Skate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For industry structure analysis, the Ice Hockey Skate industry is concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 68% of the revenue market. Regionally, Canada is the biggest sales value area in 2016, also the leader in the whole Ice Hockey Skate industry.

North America occupied 71% of the sales market in 2016. It is followed by Europe and Asia-Pacific, which respectively account for around 17% and 8% of the global total industry. Other countries have a smaller amount of sales.

For price trend analysis, a key variable in the performance of Ice Hockey Skate producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

The worldwide market for Ice Hockey Skate is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
