Abstracts

Industrial refrigeration equipment refers to machines and systems used for industrial refrigeration application, which generally include refrigeration compressor, evaporator unit, industrial rack, heat exchanger and etc.

SCOPE OF THE REPORT:

This report focuses on the Industrial Refrigeration Equipments in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the coming years there is forecasted to be stable demand scale for industrial refrigeration equipment in emerging market that is expected to drive the industry development of industrial refrigeration equipment.

Globally, the industrial refrigeration equipment industry market is not that concentrated as the manufacturing technology of industrial refrigeration equipment is mature and is related to lots of equipment. And some enterprises, like Ingersoll Rand, Johnson Controls and Daikin are well-known for the performance of their industrial refrigeration equipment and related services. At the same time, Europe, occupied 25.17% revenue market share in 2016, is remarkable in the global Industrial Refrigeration Equipment industry because of their market share and technology status.

The consumption volume of industrial refrigeration equipment is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of industrial refrigeration equipment

industry may not keep that fast. But it is surely forecasted that the market of industrial refrigeration equipment is promising.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

The worldwide market for Industrial Refrigeration Equipments is expected to grow at a CAGR of roughly 5.7% over the next five years, will reach 25400 million US\$ in 2023, from 18200 million US\$ in 2017, according to a new GIR (Global Info Research) study.
