Abstracts

Industrial temperature controller is an on-off type controller which senses the temperature of the system, compares it with a user-fed threshold temperature value and switches the heater on or off accordingly.

SCOPE OF THE REPORT:

This report focuses on the Industrial Temperature Controllers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Industrial temperature controllers are classified as single loop/multiloop temperature controllers (take revenue market share 61.09%), hybrid temperature controllers (take revenue market share 26.11 %), and analog temperature controllers (take revenue market share 12.80 %).

One driver in market is communication capability in temperature controllers. One of the main reasons for the decline of analog temperature controllers and an increase in the demand of hybrid controllers is the communication capability of these models.

Temperature controllers have undergone a number of technological advancements, such as the reduction in size and enhanced communication capability.

Key vendors are Omron, ABB, Eurotherm, Honeywell, WEST, GEFAN, Watlow, Durex Industries, Jumo, CD AUTOMATION, ASCON, PIXSYS and etc. and the top five players cover over 50% revenue market share.

The worldwide market for Industrial Temperature Controllers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
