Abstracts

Inhalation & Nasal Spray is a kind of drug used to relieve sneezing, runny, stuffy, or itchy nose and itchy, watery eyes caused by hay fever or other allergies.

SCOPE OF THE REPORT:

This report focuses on the Inhalation & Nasal Spray Generic Drugs in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Market competition is intense among the top 4. The sales of generic inhalers and nasal sprays is expected to increase even further after the release of studies that point to an increase in the number of patients suffering from restrictive and even life-threatening respiratory diseases, such as COPD and asthma. The incredibly high healthcare costs, especially in developed economies, is therefore driving this growing patient pool towards generic drugs.

The worldwide market for Inhalation & Nasal Spray Generic Drugs is expected to grow at a CAGR of roughly 6.2% over the next five years, will reach 10500 million US\$ in 2023, from 7750 million US\$ in 2017, according to a new GIR (Global Info Research) study.
