Abstracts

Insulated Metal Panels (IMPs) are lightweight composite exterior wall and roof panels with metal skins and an insulating foam core. These panels have superior insulating properties, and their outstanding spanning capabilities and one-pass installation makes them quick to install, saving costs compared to other wall assemblies. IMPs are available in a wide variety of colors, widths, profiles and finishes, enabling virtually any aesthetic desired for walls and roofs.

SCOPE OF THE REPORT:

This report focuses on the Insulated Metal Panels in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Insulated metal panel production enterprises in US are relatively concentrated than in other industries. The top 5 manufacturers occupied more than 60% of the market share. So the competition in US is intense. Some manufactures with brand awareness in US are Metl-Span, Kingspan Panel, Centria and MBCI.

The downstream industries of insulated metal panel products are Commercial/Industrial, Architectural and Cold Storage. In the recent years, with the end the recovery of economic and construction industry, the consumption increase of insulated metal panel will be obvious. In the foreseeable future, the insulated metal panel will show an optimistic upward trend.

Although sales of insulated metal panel products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the insulated metal panel field hastily.

The worldwide market for Insulated Metal Panels is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
