Abstracts

Invisible Braces has revolutionized orthodontic treatment, allowing you to transform your smile discreetly and comfortably. It uses a series of virtually invisible custom-made aligners to gradually straighten your teeth without the need for metal wires or brackets.

SCOPE OF THE REPORT:

This report focuses on the Invisible Braces in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Global invisible braces market is driven by increasing demand for invisible braces among the population given the aesthetic factors associated with the same and the growing technological innovation.

Rising disposable incomes has resulted in increasing per capita healthcare expenditure which has further led to growing focus towards healthcare, hence, building the need for invisible braces specifically among the adult population.

Over the past decade, improved technological advancements, particularly digital technologies, and increasing awareness of aesthetic alternatives to conventional braces have led to growing demand for orthodontic treatment with aligners.

While the market has witnessed a strong foothold in North America and Europe, rapid growth in the demand for invisible braces is expected to be fuelled by the emerging markets in Asia Pacific and Latin America through India and Brazil, whereas rising dental tourism in Mexico and Thailand will continue to contribute towards the invisible braces market.

The worldwide market for Invisible Braces is expected to grow at a CAGR of roughly

xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
