Abstracts

Isononanoic acid is a mixture of isomers with a 3, 5, 5-trimethylhexanoic acid content of about 90%, and is obtained by oxidation of the corresponding isononyl aldehyde. The clear, colorless liquid with a faint odor is miscible with the usual organic solvents. Isononanoic acid is only sparingly soluble in water.

SCOPE OF THE REPORT:

This report focuses on the Isononanoic Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Under the background of slower economy growth rate, companies face the higher risks of profit decline. Currently, isononanoic acid market has a certain potential in Europe, USA and Japan. These areas demand are relatively stable. During these years, China's isononanoic acid demand maintains a rapid growth. Currently, OXEA, BASF and KH Neochem are the most important production companies. Currently, the high degree of concentration of the industry, OXEA, BASF and KH Neochem control this industry. Except these three companies, there are no other major manufacturers. China is not the manufacturer, absolutely relying on import. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area. In the future, the market in developed countries will have some growth and the market in developing countries will have a faster growth rate. In the globe, emerging economies countries support the lubricant industry and metal working fluids industry, it will lead the increase of isononanoic acid demand. Therefore, we think entering China and India market will be a good choice.

The worldwide market for Isononanoic Acid is expected to grow at a CAGR of roughly 3.1% over the next five years, will reach 290 million US\$ in 2023, from 240 million US\$ in 2017, according to a new GIR (Global Info Research) study.
