Abstracts

Lactate Esters are derivatives of lactic acid. It is commonly used as a solvent or intermediate in pharmaceutical, detergent, coatings, food and fragrance production. The most common types include methyl lactate, ethyl lactate and butyl lactate, etc.

SCOPE OF THE REPORT:

This report focuses on the Lactate Esters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Lactate esters industry is dispersive relatively. Currently, there are several producing companies in the world lactate esters industry. The main market players are Corbion, Galactic, Musashino Chemical Laboratory, Vertec BioSolvents, Godavari Biorefineries, Yancheng Hongtai Bioengineering and Huade Biological Engineering, etc. The production of lactate esters will increase to 34087 MT in 2017 from 26417 MT in 2012 with CAGR of 5.23%. Global lactate esters capacity utilization rate remained at around 63.03% in 2016.

Lactate esters have several types, the common types include methyl lactate, ethyl lactate and butyl lactate, etc. And each type has its own applications respectively. With solvent and intermediate application of lactate esters, the downstream industries will need more lactate esters products. So, lactate esters have a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high purity and good performance lactate esters through improving technology.

The major raw materials for lactate esters are lactic acid, ethanol / methanol / butanol, and other auxiliary chemicals. Fluctuations in the price of the upstream product will

impact on the production cost of lactate esters. The production cost of lactate esters is also an important factor which could impact the price of lactate esters. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents decreasing trend according to the economy development status and international competition. Also, there is decreasing trend in gross margin.

The worldwide market for Lactate Esters is expected to grow at a CAGR of roughly 2.4% over the next five years, will reach 110 million US\$ in 2023, from 92 million US\$ in 2017, according to a new GIR (Global Info Research) study.
