Abstracts

The aerospace industry is one that can benefit greatly from conversion to Laser Drilling Machine. The modern aerospace industry has requirements for millions of holes per turbine engine to provide cooling during operation. These holes are required in a variety of thicknesses, angles, diameters, and geometries. The new class of Laser Drilling Machine offers this industry a faster, more versatile, more consistent, and cost-effective tool to meet their requirements.

SCOPE OF THE REPORT:

This report focuses on the Laser Drilling Machine for Aerospace in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As international economic situation is complicated, in the next few years there will be many uncertainties. Due to economic development and the high sales of Laser Drilling Machine in the international market, the current demand for Laser Drilling Machine product is relatively stable in the mature market, such as North America and Europe, but the demand in Asia-Pacific is relatively higher due to the downstream demand. Laser Drilling Machine is mainly manufactured and sold by Trumpf, Prima Power, Bystronic, Coherent and Han's Laser; and these companies occupied about 71.46% market share in 2016.

Geographically, Europe is the largest sales market in the world, which took about 38.04% of the global consumption volume in 2016 and share 33.55% of global total revenue.

Although sales of Laser Drilling Machine brought a lot of opportunities, the study group

recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the Laser Drilling Machine field hastily.

The worldwide market for Laser Drilling Machine for Aerospace is expected to grow at a CAGR of roughly 4.7% over the next five years, will reach 150 million US\$ in 2023, from 120 million US\$ in 2017, according to a new GIR (Global Info Research) study.
