Abstracts

Industrial machinery is prevalent among many different fields of industry. Linear motion is one of the basic mechanisms that design in the machinery. Linear motion utilizes sliding and rolling motions to transfer power and displacement into guiding linear-movement.

This mechanism is considered to be one of the most important factors in every industrial field.

Linear motion systems consist of linear rail, rail tables, guides, actuators, sliders, which help the manufacturing facility to continuously transfer products in a conveyor belt, or push it across for packaging.

SCOPE OF THE REPORT:

This report focuses on the Linear Motion Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Rising revenue from the replacement activities, high demand for linear motion systems in automotive industry and rapid industrialization in emerging countries are some of the key factors fueling the market growth. Meanwhile, demand for linear motion products in the electronics and electronics-assembly industries — particularly for battery manufacturing facilities and improved global economic conditions — have facilitated growth. However, lack of effective product differentiation is one of the major factors hampering the market growth.

With expected revenue of \$1778.68 million in 2018, China would be the largest regional market for linear motion products. The whole APAC region, owing to the rapid industrial development across countries such as China, India, South Korea, Indonesia, and

Taiwan, the linear motion systems market will post impressive growth in the coming years. Additionally, the growth of the automation segment will also fuel the demand for linear motion systems stock in this region.

The worldwide market for Linear Motion Systems is expected to grow at a CAGR of roughly 7.3% over the next five years, will reach 11300 million US\$ in 2023, from 7360 million US\$ in 2017, according to a new GIR (Global Info Research) study.
