Abstracts

Liquid Nitrogen (LIN, LN, LN2) Storage Tank is a type of low temperature dewars or containers that use to storage liquid nitrogen. It is usually made by stainless still of sluminium and aluminium alloys, some of them are made by glass. The small ones can be used in bio and school labs, large ones can be used in Stem Cell and Blood Banks.

SCOPE OF THE REPORT:

This report focuses on the Liquid Nitrogen Storage Tank in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Global giant manufactures mainly distributed in U.S., China and E.U. The manufacturers in U.S. have a long history and unshakable status in this field.

Manufacturers such as Chart MVE has relative higher level of product's quality. Most of Chinese manufactures locate in Sichuan and Anhui province.

In the international market, the marketing channels characteristic differ from company to company.

The giant companies are more likely to set their own big agents in some major countries and regions taking charge of regional business building their international market position.

Companies in developing countries such as China and India, in contrast, put more effort on direct selling business. They can act as exports at the same time, and it is a common phenomenon in this industry. As they do not have that much international brand influence, their product quality is not good enough when comparing with leading companies, however, they have price advantage. They like to expand their market share in developing countries and low-end international market.

The worldwide market for Liquid Nitrogen Storage Tank is expected to grow at a CAGR of roughly 3.7% over the next five years, will reach 200 million US\$ in 2023, from 160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
