Abstracts

Lithium Iodide is generally immediately available in most volumes. High purity, submicron and nanopowder forms may be considered. Hydrate or anhydrous forms may be purchased. Iodide compounds are water soluble; however, iodide-rich solutions act as better dissolution agents for creating iodide solutions. Iodides are often used in internal medicine. Treating an iodide with manganese dioxide and sulfuric acid sublimes the iodine. American Elements produces to many standard grades when applicable, including Mil Spec (military grade); ACS, Reagent and Technical Grade; Food, Agricultural and Pharmaceutical Grade; Optical Grade, USP and EP/BP (European Pharmacopoeia/British Pharmacopoeia) and follows applicable ASTM testing standards. Typical and custom packaging is available. Additional technical, research and safety (MSDS) information is available as is a Reference Calculator for converting relevant units of measurement.

SCOPE OF THE REPORT:

This report focuses on the Lithium Iodide in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The global average price of Lithium Iodide is in the increasing trend, from 124.8 USD/KG in 2012 to 132.4 USD/KG in 2016. With the situation of global economy, prices will be in increasing trend in the following five years.
