Abstracts

A mannequin (also called a manikin, dummy, lay figure or dress form) is an often articulated doll used by artists, tailors, dressmakers, window dressers and others especially to display or fit clothing.

SCOPE OF THE REPORT:

This report focuses on the Mannequins in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Although the mannequins industry competition is fierce. However, we are still optimistic about the Mannequins market. Mannequins market is in a prime stage, especially in developing countries.

Although sales of mannequins brought a lot of opportunities, the study group recommends the new entrants that just having money but without technical advantage and downstream support do not enter into the Mannequins field.

Raw material prices rise subtly in recent years, the manufacturing cost also continued to increase for that reason. According to that trend, the price will remain stable.

Global giant manufactures mainly distributed in Europe. They have unshakable status in this field. Europe takes the revenue market share of 32.19% in 2015.

The market scale will keep increasing in the next few years. The increase in the number of manufacturing, research and testing facilities and factories is expected to drive the growth of this user segment over the forecast period. However, the high cost of the systems and effectiveness of the device are the major factors hindering the growth of this market. In the future, the manufacturers who want to occupy the market must depend on market mechanism reform, core technology improvement, manufacturing

equipment innovation, brand establishment and customer training and service enhancement.

The worldwide market for Mannequins is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
