SCOPE OF THE REPORT:

This report focuses on the Marine Composites in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The composites have been the material of choice for marine manufacturers to build beautiful and innovative boats, ships, pipes and personal watercraft. Marine composites are an integral part of the marine industry. As the marine material downstream application, Powerboats is its largest downstream market, which took up 51.66% of the consumption in 2015. In 2015, the global marine composites market is led by USA, Europe and China, where the Gurit is an important producer. USA is the largest production region of marine composites in the world in the past few years and it will keep the same position in the next five years. The USA market took up about 49.87% in the global production market in 2015. Europe is the second-largest region-wise market. The market has reached saturation levels in the USA and Europe regions, while it is expanding in emerging economies such as the Asia-Pacific, Middle East, and Latin American regions. The world's large enterprises are mainly concentrated in these regions.

The worldwide market for Marine Composites is expected to grow at a CAGR of roughly 4.6% over the next five years, will reach 1520 million US\$ in 2023, from 1160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
