## Abstracts

Marine propeller is a type of fan that transmits power by converting rotational motion into thrust. A pressure difference is produced between the forward and rear surfaces of the airfoil-shaped blade, and water is accelerated behind the blade.

Mostly made of bronze, marine propeller has a very wide range of applications in most marine ships as an indispensable part of propulsion system.

A marine propeller is sometimes colloquially known as a screw propeller or screw.

### SCOPE OF THE REPORT:

This report focuses on the Marine Propeller in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Europe and Asia-Pacific (China, Japan and South Korea), is the main production base of marine propeller, key manufacturers: Nakashima Propeller
