SCOPE OF THE REPORT:

This report focuses on the Marine Propulsion Engines in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The Global Marine Propulsion Engines Market Research Report 2017 is a professional and in-depth study on the current state of the Marine Propulsion Engines market. Annual estimates and forecasts are provided for the period 2017 through 2022. Also, a six-year historic analysis is provided for these markets.

During the past few years, the global consumption of Marine Propulsion Engines increases by 9750 Units in 2017 from 11220 Units in 2012, with an average growth rate of more than -2.77%. The whole market value is about 9682.45 million USD in 2017. Regionally, Asia-Pacific is the biggest Consumption area of Marine Propulsion Engines in the world and china is the most potential market with the fastest growing rate of 1.62%

From the view of type market, Natural Engine is the most active and potential field because of environmental friendly. Although there is big difference between big companies such as Wärtsilä and new companies, especially in the price of products, customers still willing to pay more money to achieve products or service with higher quality. Therefore, it will become harder and harder for a new company which doesn't have its own core technology and R&D team to survive in this Technology-intensive battle.

For next few years, the global Marine Propulsion Engines revenue would will tend to be smooth and global consumption of Marine Propulsion Engines will be 9996 Units in 2022. With the development of technology and decline of consumption cost, the price of Marine Propulsion Engines will keep declining, and the profit margin will decline too.

The worldwide market for Marine Propulsion Engines is expected to grow at a CAGR of roughly -1.7% over the next five years, will reach 8750 million US\$ in 2023, from 9680 million US\$ in 2017, according to a new GIR (Global Info Research) study.
