## Abstracts

A mattress is a large pad for supporting the reclining body, used as or on a bed. Mattresses may consist of a quilted or similarly fastened case, usually of heavy cloth, that contains hair, straw, cotton, foam rubber, etc.; a framework of metal springs; or they may be inflatable.

Mattresses are usually placed on top of a bed base which may be solid, as in the case of a platform bed, or elastic, e.g. with an upholstered wood and wire box spring or a slatted foundation. Flexible bed bases can prolong the life of the mattress. Popular in Europe, a divan incorporates both mattress and foundation in a single upholstered, footed unit. Divans have at least one innerspring layer as well as cushioning materials. They may be supplied with a secondary mattress and/or a removable 'topper.'

### SCOPE OF THE REPORT:

This report focuses on the Mattress in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. China occupied 33.96% of the production market in 2017. It is followed by North America and Europe, which respectively account for around 24.60% and 16.42% of the global total industry. Other countries have a smaller amount of production. Geographically, China and North America were the largest consumption market in the world, which respectively took about 26.69% and 26.65% of the global consumption volume in 2017.

For price trend analysis, a key variable in the performance of Mattress producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

For forecast, the global Mattress revenue would keep increasing with annual growth rate with 5~8%. We tend to believe that this industry still has a good future, considering the current demand of Mattress.

The worldwide market for Mattress is expected to grow at a CAGR of roughly 6.5% over the next five years, will reach 42200 million US\$ in 2023, from 28900 million US\$ in 2017, according to a new GIR (Global Info Research) study.
