## Abstracts

Disposable Medical Gloves are disposable gloves used during medical examinations and procedures that help prevent contamination between caregivers and patients are made of different polymers including latex, nitrile rubber, vinyl and neoprene; they come unpowered, or powdered with cornstarch to lubricate the gloves, making them easier to put on the hands. There are two main types of gloves: exam and surgical.

### SCOPE OF THE REPORT:

This report focuses on the Medical Disposable Gloves in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Disposable Medical Gloves industry in high supply on the market in the past few years, more and more companies enter into Disposable Medical Gloves industry, the current demand for Disposable Medical Gloves product is relatively high. Ordinary Disposable Medical Gloves products on the market do not sell well; Disposable Medical Gloves' price is lower than past years. The signal of market price change indicates the trend in the Disposable Medical Gloves industry. Disposable Medical Gloves product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, and excess capacity, there is a large market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic materials.

The major production regions is Southeast Asia, especially is Malaysia, meanwhile, the

US is the largest consumption area, followed by EU.

At present, domestic Disposable Medical Gloves products has had the strength to compete with international counterparts in terms of technology and cost, and actively explore overseas markets. Meanwhile, the Disposable Medical Gloves enterprises should strengthen the information communication and the price coordination.

National relevant government departments have been made Disposable Medical Gloves product standards, and launched a series of industry policy to promote the benign development of Disposable Medical Gloves industry.

Disposable syringe production enterprises should attach great importance to environmental issues, improve production technology, and reduce industrial pollution.

Although sales of Disposable Medical Gloves brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the Disposable Medical Gloves field.

The worldwide market for Medical Disposable Gloves is expected to grow at a CAGR of roughly 2.5% over the next five years, will reach 4530 million US\$ in 2023, from 3900 million US\$ in 2017, according to a new GIR (Global Info Research) study.
