Abstracts

A pressure sensor is a device that senses pressure and converts it into an electric signal where the amount depends upon the pressure applied. Medical pressure sensors monitor a patient's condition by providing accurate and reliable diagnostics in a broad range of conditions.

Typically, medical pressure sensors are used to measure gage or differential pressures. Measurement of these pressures can then be used to calculate volumetric flow rates as well as fluid, gas or air volumes.

SCOPE OF THE REPORT:

This report focuses on the Medical Pressure Sensors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the medical pressure sensors industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in USA and Europe. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. The key consumption markets locate at developed countries. North America and Europe takes the market share of over 60%. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost has competitive disadvantage, as the Chinese medical pressure sensors production technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase. But the production technology is relatively laggard, it can only produce some low-end product, although the new production lines is increasing, the high-end product is still relying on import.

By end user, the global pressure sensors market is segmented into Respiratory Devices, Patient Monitors Devices, Diagnostics/Analytical Equipment, Surgical instruments etc. In 2015, the Respiratory Devices application include Anesthesia Delivery Machines, Oxygen Concentrators, Sleep Apnea Machines (CPAP machines) and Ventilators held the largest share in the global market and accounted for a market share of 41.74%.

The worldwide market for Medical Pressure Sensors is expected to grow at a CAGR of roughly 7.7% over the next five years, will reach 930 million US\$ in 2023, from 600 million US\$ in 2017, according to a new GIR (Global Info Research) study.
