North America accounted for the leading share of the global market in terms of revenue and is anticipated to continue its dominance during the forecast period. Europe is expected to follow North America in the market for medical videoscopes. However, sluggish growth of the economy in the region is likely to negatively impact the market in Europe during the forecast period. The market in Asia Pacific is anticipated to register a significantly high CAGR from 2017 to 2025, owing to factors such as increasing health

care expenditure by governments, rising research funding, growing awareness related to endoscopic procedures among people, surging number of training centers for endoscopy, and focus on developing endoscopic infrastructure in the region.

The worldwide market for Medical Videoscopes is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
