Abstracts

Medium Voltage Switchgears are a complete set of switchgears and control equipments used for Medium Voltage (3.6-40.5kV). It acts as a power center and a main power distribution unit. Mainly used for power lines, the main electrical equipment control, monitoring, measurement and protection. Often set in the substation, power distribution room, etc.

SCOPE OF THE REPORT:

This report focuses on the Medium Voltage Switchgears in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. ABB, Schneider Electric and Siemens captured the top three revenue share spots in the Medium Voltage Switchgears market in 2016. ABB dominated with 8.39 percent revenue share, followed by Schneider Electric with 7.18 percent revenue share and Siemens with 6.65 percent revenue share.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Against a backdrop of tough economic climate, corporate success will critically hinge upon the ability to research and develop new innovative products at competitive prices and validate new applications for existing products to distinguish themselves from that of competitors. Growth in switchgears will also be sustained by government directives to replace older redundant systems to achieve operational safety, and security in industrial establishments.

The worldwide market for Medium Voltage Switchgears is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
