Abstracts

Menthol is an organic compound with the chemical formula $C_{10}H_{20}O$ that occurs naturally in mint and some other plants. It can be extracted from the leaves by distillation, and it can be made synthetically. Pure menthol is a crystalline solid. The compound is widely used in cough and cold remedies because of its soothing effects and as a flavoring in candy, chewing gum, medical products and cigarettes.

The data of the report is based on the menthol product with purity of 99%min. And other products in lower menthol purity have been converted in the equivalent of 100%.

SCOPE OF THE REPORT:

This report focuses on the Menthol in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In favor of direct mail is that customers get product information and place orders from their homes or offices easily. Against is the flood of junk mail that makes direct mail unwanted by association and inattentively thrown away or destroyed.

In favor of telemarketing, conversations offer opportunities to answer questions, take product orders, and do customer service. Against is that telemarketers make uninvited cold calls that interrupt customers and talk them into buying products they then decide they don't want. Telemarketing is particularly unpopular in areas with Do Not Call registries.

Indirect marketing makes no attempt at immediate sales but instead focuses on building relationships of trust by finding out what consumers want and helping them find it.

Consumers search the Internet for answers to their questions or solutions to their problems. Indirect marketing offers them knowledge and advice in blogs, social media,

newsletters, and videos.

The worldwide market for Menthol is expected to grow at a CAGR of roughly 5.8% over the next five years, will reach 5390 million US\$ in 2023, from 3850 million US\$ in 2017, according to a new GIR (Global Info Research) study.
