Abstracts

Metal Aerosol Can is a kind of metal storage container, if a can is designed to spray out its contents, it is an aerosol can. Examples include spray paint, hair spray, room deodorizers and many more.

SCOPE OF THE REPORT:

This report focuses on the Metal Aerosol Can in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Aerosols are usually packaged in aluminum cans or tinplate cans. The cost of a tinplate aerosol can is normally cheaper than the cost of an aluminum aerosol can with the same dimension. However, aluminum aerosol cans are characterized by their pressure tolerance and relatively high flexibility which provides them with capability of being manufactured in sophisticated and easy-to-grip shapes. They are also generally perceived to be more pleasing by consumers compared to tinplate aerosol cans. These characteristics contribute to the core competitiveness of aluminum aerosol cans, as well as the increasing proportion of aluminum aerosol cans in the total output of aerosol cans.

The technology here is much more mature than in the emerging market. The main drivers of the market are: the development of the economy, policy support, consumer products development, and environment friendly and recycling awareness.

At present, there are seven companies make up more than 80 % market share of the US Metal Aerosol Can market, and the top two manufacturers are Ball and Crown, making more than 50% market share of the total market in US.

The US Metal Aerosol Can market has been growing slower in recent years; the

manufacturers are facing the fierce competition in the market. So, they are concerning more on their innovation R&D of new materials and technology. The US Metal Aerosol Can market still has a lot of opportunities with the development of economy and huge market ahead. Even though, the enterprises have to develop new technologies to meet the client's different needs.

The worldwide market for Metal Aerosol Can is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
