## Abstracts

Metal composite panel refers to coat one metal board with another one to save resources and reduce the cost without reducing the effect of corrosion resistance, mechanical strength, etc. Composite methods are usually explosive compound, explosion and rolling composite, rolling composite.
There are several common metal composite panels: aluminum composite panels, copper clad steel plate, zinc composite plate, nickel-titanium composite plate, nickel steel composite panels, nickel-copper composite panels.
Metal composite panel is often used in construction for building curtain walls and interior decorations.

**SCOPE OF THE REPORT:**

This report focuses on the Metal Composite Panel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
Construction is a major application of metal composite panel, which can be classified as building curtain wall and interior decoration. Metal composite panel can also be used in fields, like anti-corrosion, pressure vessel manufacturing, electrical construction, petrochemical, pharmaceutical, light industry, Furniture and other industries. Building curtain wall is the largest application of metal composite panel, with market share of 60.55% in 2016. Interior decoration takes market share of 27.12%.
