Abstracts

Metallographic Cutting Machine is used for cutting the metallographic specimens with irregular shapes such as cylinder, polygon etc., so as to observe the metallographic and lithofacies structure of the material.

Most metallographic samples need to be cut to the area of interest and for easy handling. Depending upon the material, the cutting operation can be done by abrasive cutting wheels (metals and metal matrix composites), or diamond cutting wheels (ceramics, electronics, biomaterials, minerals).

SCOPE OF THE REPORT:

This report focuses on the Metallographic Cutting Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Global production of metallographic cutting machine was about 5603 units in 2015, and will reach to 5710 units in 2016. From 2011 to 2015, the annual growth rate was about 3.39%.

The major producer located in EU and US, such as Struers, LECO, Buehler, ATM, Allied, METKON, Kemet and PRESI, these companies occupied above 70% market share. And the top three players occupied above 40% market share.

Europe and North America are the largest consumption regions, occupied about 60% market share. Emerging markets are in a stage of rapid development, such as China, India etc. Metallographic cutting machine is mainly used in the laboratory and industrial field.

In the future, the growth rate will be about 3.07%, and the production will reach to 6640 units in 2021. Finally, although sales of metallographic cutting machine products bring a

lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the metallographic cutting machine field hastily.

The worldwide market for Metallographic Cutting Machine is expected to grow at a CAGR of roughly 2.1% over the next five years, will reach 110 million US\$ in 2023, from 100 million US\$ in 2017, according to a new GIR (Global Info Research) study.
