Abstracts

Nanoparticles are sub-nanosized colloidal structures composed of synthetic or semi-synthetic polymers. These are used in biotechnology and pharmaceutical sectors for studying biological systems for diagnosing diseases and focusing on treatment at the molecular level. The properties of many conventional materials alter when formed from nanoparticles, the reason being nanoparticles have a greater surface area per weight than larger particles, making them more reactive to other molecules

SCOPE OF THE REPORT:

This report focuses on the Nanoparticles in Biotechnology and Pharmaceuticals in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The nanoparticle segment of the nanotechnology has wider application in pharmaceuticals such as in drug delivery and drug discovery, and in biotechnology such as in studying cellular dynamics and stem cell research. Nanotechnology is growing steadily supported by governments and technology firms making high investments in developing nanotechnology.

Sedentary lifestyles and unbalanced diets, supported by the growing rate of urbanization, are consequent in increased widespread prevalence of chronic diseases. Chronic and lifestyle diseases such as cancer, heart diseases, stroke, chronic respiratory diseases, and diabetes. Nanoparticles are utilized to determine the biological alterations of peptide and protein fragments. This diagnosis aids in developing new

treatment solutions to treat the growing incidences of chronic diseases. The increasing prevalence of chronic diseases is identified to be one of the key trends having a positive impact on the nanoparticles market in biotechnology and pharmaceutical sectors.

The worldwide market for Nanoparticles in Biotechnology and Pharmaceuticals is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
