Abstracts

Narrow body aircrafts are the kinds of aircraft which have single aisle. Narrow body aircrafts (NBA) have less capacity than double aisle aircraft and can seat seven to ten seats abreast. Narrow body aircraft were originally designed for passenger comfort, space, and efficiency and are mainly used in regional transport.

SCOPE OF THE REPORT:

This report focuses on the Narrow-body Aircraft Engine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The rise in disposable incomes and the increased purchasing power of customers has resulted in an increase in air travel. To meet this exponential demand, aviation companies are bringing in more regional aircrafts and this in turn will increase the need for narrow-body aircraft engines.

Moreover, these manufactures also procure new engines for replacing the old engines. With the rising demand, narrow-body aircraft engine manufacturers are developing faster delivery processes and are adopting lean manufacturing techniques to lower the total lead time required to manufacture aircraft engines.

The worldwide market for Narrow-body Aircraft Engine is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
