Abstracts

Food coloring, or color additive, is any dye, pigment or substance that imparts color when it is added to food or drink. They come in many forms consisting of liquids, powders, gels, and pastes. Food coloring is used both in commercial food production and in domestic cooking. Food colorants are also used in a variety of non-food applications including cosmetics, pharmaceuticals, home craft projects, and medical devices.

SCOPE OF THE REPORT:

This report focuses on the Natural Food Colors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Growing demand for the product across various industries such as beverages, bakery & confectionary, and dairy products is likely to have a positive impact on the utilization of food colors in the foreseeable future. The demand for food colors for the production of canned products is also estimated to drive the industry growth.

It has been observed that when compared to monochromatic food products, multi-colored food products have an increased aesthetic appeal which results in increased sales. purchases of food colors. With the need to restore the color lost during food processing and the rise in health-conscious customers across the globe, the demand for natural food colorants will increase in the coming years.

The worldwide market for Natural Food Colors is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
