Abstracts

Nature gas pipeline is a kind of pipe specially used for gas transportation.

SCOPE OF THE REPORT:

This report focuses on the Natural Gas Pipeline in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Steel is one of the major raw materials used in manufacturing natural gas pipelines and studies have shown that the cost of steel amounts to almost 16% of the total cost for manufacturing one mile of gas pipeline. As a result, the current trend of decreasing steel prices will significantly drive the growth of the natural gas pipeline market in the next few years. Though the rise in energy prices increases the manufacturing costs, the reduction in prices of Iron ore and steel scrap, which are used as raw material to make steel, will fuel the growth of the natural gas pipeline market over the forecast period.

The worldwide market for Natural Gas Pipeline is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
