Abstracts

Natural products are derived from plants and minerals that are sourced from nature whereas organic products are derived from natural ingredients, which are free from chemicals and pesticides.

SCOPE OF THE REPORT:

This report focuses on the Natural and Organic Personal Care Products in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Increasing consumer demand for eco-friendly personal care products has prompted companies such as Garnier, Henkel, and Amore Pacific to enter into the natural and organic personal care products market and develop new and advanced products. Manufacturers are continuously launching organic personal care products with clinical backing in order to expand their customer base. Rising number of innovative personal care products with antioxidant properties, including those with herbal extracts are expected to fuel the demand for natural and organic personal care products over the forecast period.

Moreover, increasing number of working individuals in countries across the globe is resulting in increasing spending capacity, which in turn is leading to increased sales of quality products. This is further resulting in increasing demand for better quality products such as natural and organic personal care products globally.

Increasing aging female population is driving demand for various anti-aging products such as creams, moisturizers, and anti hair fall products. Moreover, increasing spending power of women aged 25 and above is another factor driving sales of natural and

organic personal care products. This is attributed to higher willingness of women consumers in this age group to spend on premium quality personal care products. The target audience for personal care manufacturing companies ? currently and in the recent past ? has primarily been the young-adult population ranging between 15 to 25 years of age.

The worldwide market for Natural and Organic Personal Care Products is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
