Near-infrared (NIR) Analyzer is a widely used analysis technique for identification of raw materials and quantification of substances in research and industrial applications.

Near Infrared (NIR) Analyzer is spectroscopic equipment using the near-infrared region of the electromagnetic spectrum (from about 700 nm to 2500 nm, and typical applications include medical and physiological diagnostics and research including blood sugar, pulse oximetry, functional neuroimaging, sports medicine, elite sports training, ergonomics, rehabilitation, neonatal research, brain computer interface, urology (bladder contraction), and neurology (neurovascular coupling). There are also applications in other areas as well such as pharmaceutical, food and agrochemical quality control, atmospheric chemistry, and combustion research.

SCOPE OF THE REPORT:

This report focuses on the Near-infrared Spectroscopy (Near Infrared (NIR) Analyzers) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Near Infrared (NIR) Analyzers is a technology-intensive industry. There are less than twenty manufacturers in this industry. The sales revenue share of Thermo Fisher is about 17.17% in 2016, which is the No.1 of the global near-infrared spectroscopy industry. The other competitors include Foss A/S (13.73%), Bruker (10.45%), PerkinElmer (9.18%), Buchi Labortechnik, Unity Scientific (KPM Analytics), Shimadzu, Jasco, Agilent Technologies, Yokogawa Electric, Sartorius, and ZEUTEK etc. The

competition status wouldn't be change in the short term. The growth of near-infrared spectroscopy industry depends on the acceptance of enterprise.

The global Near Infrared (NIR) Analyzers industry has reached a sales volume of approximately 5638 Unit in 2016. The global near-infrared analyzers industry has reached the value of approximately 438 million USD in 2016. The growth of the near-infrared analyzers technology market is also driven by factors, such as an increasing adoption in Food and agriculture industry and Pharmaceutical industry. However, factors such as high investment and installation cost are hindering the growth of this market.

In the coming years, near-infrared analyzers market is expected to witness the highest growth rate in the Asia-Pacific region. Companies must be aware of their competitive surroundings within their market. Being aware of competitor's strategy can prevent a lag in reaction to a change within this market. This especially true in the near-infrared analyzers Industry because of its high growth in the Asian Market. It is important for European and North American manufactures to monitor the Asian Market closely and follow any new technologies they may develop or else they may find themselves not able to produce at the speed and with the quality needed. Although near-infrared analyzers brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The worldwide market for Near-infrared Spectroscopy (Near Infrared (NIR) Analyzers) is expected to grow at a CAGR of roughly 3.9% over the next five years, will reach 580 million US\$ in 2023, from 460 million US\$ in 2017, according to a new GIR (Global Info Research) study.
