Abstracts

Endoscopy is a minimally invasive (MI) medical procedure that is used for the diagnosis, prevention, and treatment of complications in the internal organs of the body. A neurology endoscopy device, which is a type of endoscope, is inserted into the patient's brain through a small incision.

SCOPE OF THE REPORT:

This report focuses on the Neurology Endoscopy Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Since surgical instruments and accessories are highly adopted products in the endoscope camera market, it has led to the massive growth of this segment. The requirement for surgical instruments and accessories is growing continuously owing to the rising incidences of brain tumor. Companies such as Aesculap, Hawk, and Richard Wolf are dominating the market by launching neurology endoscopes and surgical instruments and accessories.

Owing to the surging incidences of brain cancer and brain tumor, the adoption rate of neurology endoscopy devices is high. This high rate of adoption will primarily lead to the growth of this market segment. Several companies in the endoscope camera market are integrating the neurology endoscopes with robotic platforms, which will not only increase the efficacy of brain tumor surgeries but will also augment the number of endoscopy procedures.

The worldwide market for Neurology Endoscopy Devices is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from
