In the past few years, the price of non-stick pans show an increasing trend in recent years and we expect the price may keep the trend in a short period. However, as the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of Non-Stick Pans. Therefore, to some extent, the companies are facing a risk of profit decline.
There are companies adding capacities and aiming at the cost and quality leadership which shall improve profitability.
