## Abstracts

Optical fiber preform, or fiber preform, is a kind of silica glass rod which has a special refractive index of profile. It is used to produce optical fiber.

### SCOPE OF THE REPORT:

This report focuses on the Optical Fiber Preform in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As a result of the past few years the world economy is not stable, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Optical Fiber Preform industry in short supply on the market in the past few years, more and more companies enter into Optical Fiber Preform industry, The signal of market price change indicates the trend in the Optical Fiber Preform industry, the current demand for Optical Fiber Preform product is Sustained growth.

In China, the high-end Optical Fiber Preform materials mainly rely on import from foreign developed countries, like US and Japan. To meet the large demand for the high-end products, Chinese manufacturers will invest much more on the R&D, which will certainly weaken the dependence of imports.

As large demand of at home and abroad, many companies began to enter the field of high-end. Currently, the Chinese Optical Fiber Preform industry is not only begin to transit to Optical Fiber Preform products, while still extend in the resource-rich land and downstream industry chain.

Although sales of Optical Fiber Preform brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and

downstream support do not to enter into the Optical Fiber Preform field.

The worldwide market for Optical Fiber Preform is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
