Abstracts

A palletizer or palletiser is a machine which provides automatic means for stacking cases of goods or products onto a pallet.

Manually placing boxes on pallets can be time consuming and expensive; it can also put unusual stress on workers. The first mechanized palletizer was designed, built, and installed in 1948 by a company formerly known as Lamson Corp. There are specific types of palletizers including the row-forming which were introduced in the early 1950s. In row-forming palletizing applications loads are arranged on a row forming area and then moved onto a different area where layer forming takes place. This process repeats until a full layer of goods and products are configured to be placed on a pallet.

SCOPE OF THE REPORT:

This report focuses on the Palletizer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Palletizing Machine industry in short supply on the market in the past few years, more and more companies enter into Palletizing Machine industry, the current demand for Palletizing Machine product is relatively low, lack of demand, excess supply. Ordinary Palletizing Machine products on the market do not sell well, Palletizing Machine's price is lower than past years. The signal of market price change indicates the trend in the Palletizing Machine industry, low-end product has excess capacity.

While marine coatings manufacturers expressed cautious optimism for recovery from the economic downturn, raw material prices continue to negatively affect the marine coatings market.

Palletizing Machine product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials.

The worldwide market for Palletizer is expected to grow at a CAGR of roughly 4.9% over the next five years, will reach 1050 million US\$ in 2023, from 790 million US\$ in 2017, according to a new GIR (Global Info Research) study.
