HDPE pipe systems provide sustainable and harmless solution to growing demand for clean water and modern sewer systems. The new applications in the field of storm water drainage, marine crossing, intake and outfall, fire loops, district heating and domestic geothermal technology rely on superb properties of HDPE material, its long service life and thriving long track record of more than 60 years.

The PE pipe resin market was dominated by several international petrochemical companies, such as LyondellBasell, Dow, Borealis and so on. The top 5 producers contributed about 50% sales share globally. The market is relatively concentrated.

With gradual recovery of global economy, plastic pipe industry will become promising in the coming few years. PE pipe is competing with PVC pipe and PP pipe in the plastic pipe industry. With distinctive characteristics, PE pipe will be used more and more common in some field, such as water supply system, gas & oil industry, etc. Market insiders predict that stimulated by the pipe industry, global PE pipe resin market will reach to 7000 million USD in the year of 2023.
