Abstracts

Pet grooming refers to the products which are used to hygienic care and cleaning of a pet, as well as a process by which a pet's physical appearance is enhanced for showing.

SCOPE OF THE REPORT:

This report focuses on the Pet Grooming in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Most American pet owners consider their pet their best friend, a notion supported by a comparison of the number of pet owners and the increase in pet retail sales: While the number of people living in households with at least one pet and the number of people who have shopped for pet supplies have been consistent over the last few years, consumers have been spending more and more money for their pets, thus boosting pet grooming retail sales in the United States.

The United States pet grooming industry has reached a sales volume of approximately 71670.79 K units in 2015. The average growth rate of pet grooming is 7.38% in 2016 to 2021 which is higher than the growth of whole pet industry in USA.

Despite the presence of competition problems, due to the clear United States recovery trend, investors are still optimistic about this area. In future there will be more new investment enter into the field.

Though the industry is highly competitive, small entrepreneurs can succeed if they find a specialty market and provide customers with a product and focus they don't get at large pet retailers. The pet grooming industry brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage

and upstream and downstream support do not to enter into this field.

The worldwide market for Pet Grooming is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
