SCOPE OF THE REPORT:

This report focuses on the Pipe Joints in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Pipe components are typically used in laying pipelines that provide means of transport for fluids into and out of the building. Given that efficient pipe is a critical requirement for all buildings, demand for pipe joints and fixtures is dependent on the level of construction activity, which in turn is influenced by the overall health of the economy. The level of economic growth and construction activity primarily dictates market prospects for pipe joints.

Rapid urbanization in developing countries will continue to drive growth in the market, since strong urban concentration will trigger increases in infrastructure expenditure, and urban planning. The creation of large megacities involves the construction of high-rise buildings and skyscrapers, which in turn increases prospects for pipe work, thus driving market prospects for pipe joints and fixtures.

Globally, pipe joints are mainly consumed in USA, Europe and China. China is the largest consumption region with consumption amount of 1512.7 M pieces in 2017.

During all those regions, Asia has largest CAGR during past five years and greatest market potential.

The worldwide market for Pipe Joints is expected to grow at a CAGR of roughly 4.4% over the next five years, will reach 10500 million US\$ in 2023, from 8130 million US\$ in 2017, according to a new GIR (Global Info Research) study.
