## Abstracts

Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications. Polycarbonates do not have a unique resin identification code (RIC) and are identified as 'Other', 7 on the RIC list.

### SCOPE OF THE REPORT:

This report focuses on the Polycarbonates in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa.
