## Abstracts

Polymethacrylimide (PMI) foam composite has many excellent properties. Currently, PMI is heat-resistant foam, with the highest strength and stiffness. It is suitable as a high-performance sandwich structure core material. It can replace the honeycomb structure. It is widely used in aerospace, aviation, military, marine, automotive and high-speed trains, etc.

### SCOPE OF THE REPORT:

This report focuses on the Polymethacrylimide Foam in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Polymethacrylimide (PMI) foam by the German Rohm (Degussa's predecessor) in 1962 developed, industrial production began in 1971, in 1972 it was used in aviation fields. Today, PMI foam has a very wide range of applications, other institutions at home and abroad in recent years, also started the high performance foams further research and development.

At present, the market is dominated by Evonik, the industrial production of polymethacrylimide (PMI) foam in China is still at the starting stage. Until now, only two companies can manufacture polymethacrylimide (PMI) foam, Hunan Zihard Material Technology and Cashem Advanced Materials Hi-tech. With the high speed development of aerospace, transportation, ship and wind energy in China, the demand of PMI foams is increasing. A number of companies and institutes focus on the study of PMI foams.
