The electronics application sector is another promising area in which polysilicon plays a vital role in recent years. As for the polysilicon for electronics, the silicon with purity is between 99.9999999 percent and 99.999999999 percent (9N to 11N purity) commonly.

SCOPE OF THE REPORT:

This report focuses on the Polysilicon in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Polysilicon for Electronics can be widely used in many industries. Survey results showed that 89 % of the Polysilicon for Electronics market is semiconductor industry, 7.23% is optics and others accounted for 3.65% in 2015. With the development of economy, these industries will need more Polysilicon for Electronics. So, Polysilicon for Electronics has a huge market potential in the future.

We tend to believe this industry is an emerging industry, and the consumption increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

The worldwide market for Polysilicon is expected to grow at a CAGR of roughly 6.0% over the next five years, will reach 3060 million US\$ in 2023, from 2160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
